## The Mobile Presentation Island Exciting presentation!

The Mobile Presentation Island is the perfect solution for your product display! Attractive images and messages will get your customers to focus all their attention on your product! The Mobile Presentation Island is an innovative and expandable modular system which is perfectly suited for professional secondary placements, special offers etc.

### The Mobile Presentation Island

- conveys attractive images and messages over a large area
- is of modular design and can be optimally adapted to meet individual space requirements
- is lightweight, movable and can be quickly set up and dismantled
- can be folded down flat and stored in a space-saving manner
- is suitable for a wide range of products

## This is how the Mobile Presentation Island (MPI) works

A plastic or cardboard ring is inserted into a sturdy plastic base frame. A flat or slanted stacking frame is then placed onto the ring which acts as a product holder.

The Mobile Presentation Island is ideal for the presentation of fruit and vegetables in plastic, cardboard or wooden crates. A flat tray can optionally be inserted into the stacking frame, thereby making it suitable for the display of flowers, plants, herbs as well as bread, pastries and other products.

The plastic or cardboard ring comes in the colour of your choice and can be printed individually. This allows you to convey emotions to your customers by means of appropriate images and messages.

The base frame can be fitted with legs or wheels, the latter allowing the Presentation Island to be flexibly moved to the first customer touch point outside of the store.

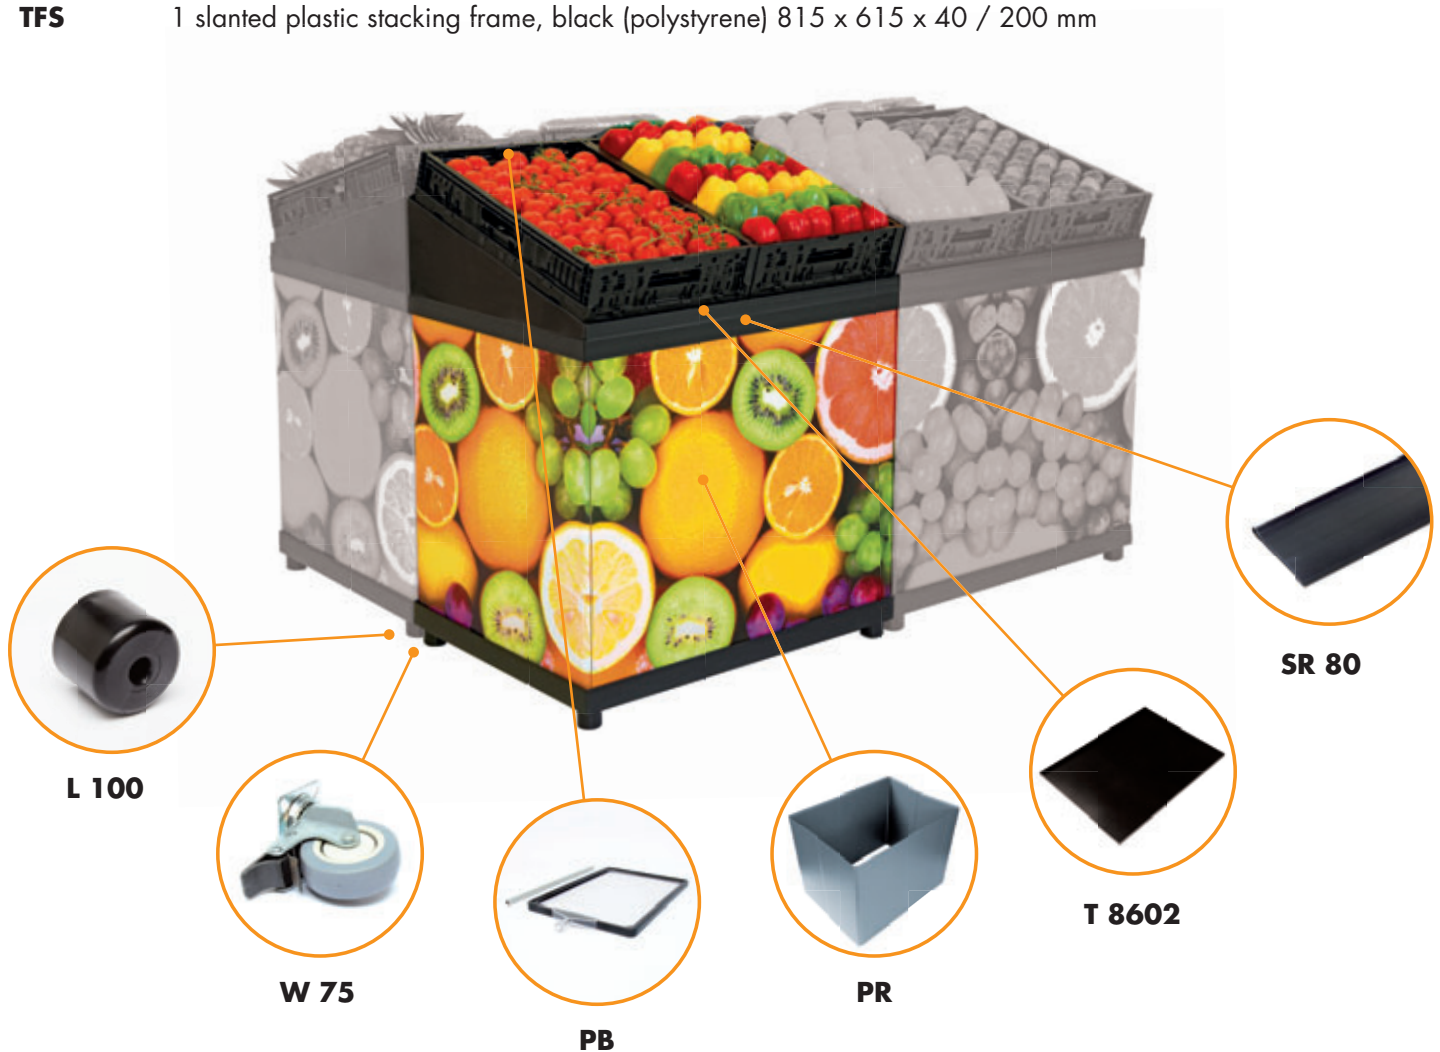

The Mobile Presentation Island features a range of additional equipment.

## The standard version MPI 8685 consists of

<b>L 40</b>	4 legs, height 40 mm, diameter 50 mm
