

Subject: Mobile Presentation Island

We have been using the Mobile Presentation Island from Pack´nlog in our sky-supermarkets since December 2015. We are applying the practical modular system in the whole outlet – especially in the fruit and vegetable department, in the entrance area and also as an additional placement. The exchangeable cardboard ring offers an easy and cost-efficient solution to optimally present the offers from our weekly leaflets in the whole outlet. Thanks to the Mobile Presentation Island, the visual appearance was definitely improved and the appearance of our products presented as „Gutes für die Woche“ could be especially emphasized at the Point of Sale.

We can definitely recommend the Mobile Presentation Island from Pack´nlog.

Best regards
Mirko Butter
